RAVINE CREEK RANCH

SATURDAY, MARCH 5, 2011 . 1 PM
MAGNESS LIVESTOCK, HURON, SD

WELCOME

Welcome to our annual production sale. 2010 has been an interesting year at Ravine Creek Ranch. Excessive moisture during the summer made crop production a real challenge. But with the moisture also came adequate pasture for the cattle all summer long.(except for the drowned out areas!)

The cattle market is really strong right now and the time is right to invest in some good breeding stock. And we feel we have a strong set of bulls and females for you to make your selections from.

We believe that our herd and the Hereford breed has improved significantly in the last decade. EPD's are now more accurate and meaningful than in the past. Today's Hereford has a lot to offer the beef industry. Research has proven that Hereford bulls add hybrid vigor and profit to the country's dominately black cow herds. Crossbreeding pays and we think Herefords should be part of your program.

Our goals remain the same~to increase pay weights, improve carcass traits while maintaining calving ease. We strive to bring the best Hereford genetics available to you, the commercial producer, and this in turn will improve your profit potential.

CALVING EASE:

There is more to calving ease than birth weight. Birth weight, shape of calf at birth, pelvic area, size of cow and nutrition during gestation can all effect calving ease. BW and MCE should both be considered when selecting bulls. Continued selection for just light BW can lead to low growth rates.

All sale cattle have been DNA tested for three genetic abnormalities-Dilutor(DL), Hypotrichosis(HY) and Idiopathic Epilepsy(IE). All are DLF, HYF & IEF. "F" meaning free of these genetic abnormalities.
