Dear Fellow Cattlemen and Friends,
Welcome to our 52nd Annual Production Sale. We would like to extend an invitation to each of you to be with us on Tuesday, March 20th.

The future of the cattle business looks more optimistic than I have ever seen it with the nation's cow herd numbers at an all time record low and the demand for beef growing in other countries as well as consumer demand in this country still being strong. The demand for Hereford cattle has been phenomenal across this country as the whiteface is being highly sought after in crossbreeding programs. Using Hereford bulls on Angus, Red Angus and other breeds of cows is producing top feeder steers and the most sought after replacement females in the country. The future of the cattle industry looks good down the road.

Our breeding program here is aimed at total performance. Everyone's program is different and each has a specific purpose for their bulls' needs. Some programs need calving ease, others need growth and performance while others may need milk in their females. Perhaps some are looking for better carcass traits. Our goal here is to have a program that is balanced in all traits. This way, we hope to be able to have something to assist everyone.

This year, we feel we have the best set of total performance bulls and heifers that we have ever offered for sale. They have the phenotype as well as the numbers to go with them.

This year, like the last couple of years, we are offering a conference call number. It is a toll free call where up to 125 people can listen in and bid. More information is on the next page.

Please come Monday and look over the cattle. There will be food in the late afternoon.
Give us a call and we will assist you in selecting cattle that will help fit your program best or for any other needs you may have.

Sincerely,

Russ and Roger Tegtmeier

Russ 402-865-5805 • Roger 402-865-4365

will be available sale day.***

Sale Terms and Conditions

1. Terms — Cash or Check. Each animal to be sold to the highest bidder. The auctioneer shall settle any dispute as to bids.
2. All cattle are to be paid for by the purchaser during or immediately after the sale unless other arrangements have been made prior to the sale.
3. Each animal will be the purchaser's risk immediately after the animal is sold. They will be fed and cared for free of charge for a reasonable length of time after the sale but at the purchaser's risk.
4. If the buyer of an AI certificate bull or heifer that is not already registered wishes to have them registered, that certificate price will be announced from the auction block before the animal is sold.
5. All cattle will be sold in compliance with the health laws of the state of Nebraska.
6. Breeding Guarantee — All bulls and females are guaranteed to be breeders if given proper care. Heifers pronounced safe in calf by the veterinarian shall be considered breeders without any further guarantee. Any animal failing to breed within five months may be returned to the seller if in as good condition as when sold. The seller reserves the right to try said animal for five months. If the animal proves to be a breeder, the owner gets the bull at his expense. If it fails to be a breeder, an exchange will be made or his money returned.
7. All persons who attend the sale do so at their own risk. Owner assumes no liability, legal or otherwise, for any accidents which may occur.
8. Bids may be sent to any of the sale staff.
9. Please be assured if you buy cattle we will take care of them for a reasonable length of time, especially where long distance travel is involved.
10. Owner reserves the right to make additions or withdraw any cataloged entries if they fail to meet our standards at sale time.
11. Announcements at the sale ring concerning the cattle will take precedence over statements in the catalog.

Hereford-sired **Mama:** the one to bank on

A 7% advantage in
conception rate.

Net income of
\$51 more
per cow per year.

A significantly
higher selling price
for bred heifers.

New data proves it

All this from Hereford-sired females compared to straight Angus females in a recent, large-scale study documenting the advantage of Hereford-based heterosis.* See all the data at www.hereford.org.

Hereford — making black better.

• 45P is an all-around top herd bull leader. He has stood the test of time and has been one of the top AI sires in the U.S. He has met our goals of a total performance sire. His EPDs are proving that as these numbers have been developed from several different herds in the country and Canada. His bulls have what the commercial man desires and his females are really proving themselves now that quite a few are in production. His maternal milk of 29 reflects this.

- 101X is an attractive, well-muscled grandson of the great Remitall Keynote 20X. Dam was one of the top selling females in the Klippenstein Family Farms dispersal.

Bred Heifers

The following heifers are bred to calve this spring. They were synchronized and bred AI. The pasture exposure was to CT GHC Peacemaker 123R who has been a very easy calver for us. This group of bred heifers is very hard to part with.

Ref. Sire — GHC Premier 155K

CT Miss Premier 129U — Daughter of 155K
Sold in last year's sale to Crittendens in Canada
and soon to be a donor cow for them.

- We wanted to share some of 66X's first genetics through this sale. 75M that he's mated to has been an outstanding cow for us. She sports a beautiful, level udder and really gets the job done. Plus, she has some of the oldest, time-tested genetics of the breed, being a granddaughter of Klondike Vindicator 504L.

Makayla Rutt

2012 Nebraska Polled Hereford Queen

Defining EPD Terms

(Expected Progeny Difference)

EPDs are a prediction of how an animal will perform compared to other animals in the Hereford breed. They are not to be used in comparing animals of other breeds.

CE (Calving Ease — Direct) — More positive EPDs are favorable and indicate easier calving for females calving at two years of age.

BW (Birth Weight) — Expressed in pounds for progeny comparison between animals. The only EPD that the advantage is expressed in a lower number.

WW (Weaning Weight) — Expressed in pounds when comparing an animal's progeny for adjusted 205-day weights.

YW (Yearling Weight) — Expressed in pounds when comparing an animal's progeny for adjusted 365-day weights.

MM (Maternal Milk) — The milking ability of a sire's daughters expressed in pounds of calf weaned.

REA (Ribeye Area) — Reflects differences in size of an adjusted 365-day ribeye measurement.

MARB (Marbling) — Reflects differences in percent of marbling based on adjusted 365-day MARB carcass measurement.

BMI\$ (Baldy Maternal Index) — A maternally focused index expressed in dollars returned from mating a Hereford bull to black cows.

CEZ\$ (Calving Ease Index) — A general index that is specifically designed to be used in a heifer program.

CHB\$ (Certified Hereford Beef Index) — A terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market.

2.7	60	99	23	53	-0.045	0.50	0.30

- We purchased this top calf last spring from our good friend John Loewen, Waukomis, Oklahoma. This calf puts it all together: 74 lb. BW, top 1% of the breed for WW and YW EPDs, red-eyed and conservatively marked.
- This Advisor son has a unique combination of calving ease, growth and carcass. If you do an EPD search, 66X is the only Hereford animal with this combination of calving ease, weaning and yearling weight, scrotal, REA and MARB. His dam is a freckle-faced M326 daughter that is one of John's best.
- Act. BW, 73; Adj. 205 WW, 624; Adj. 365 YW, 1,165
- Co-owned with Loewen Herefords

Vogler Semen Centre, Inc.

'Your Semen Freezing Specialists'

Is it a Bull or a Heifer *You Decide!*

Vogler Semen Centre has teamed up with Sexing Technologies to provide the Midwest with the latest technology in *Sexed Bovine Semen*.
